

Some diagnostics of the quality of the PSF, measured on individual, chop-subtracted pairs of frames

X, Y (pix) of the centroids on individual chop-subtracted pairs, relative to the X0,Y0 (pix) centroid measured on the first pair. Illustrates how the source position on the detector changes along the observation

0002329400-20191014 ; Si2-8.7 ; 8.0 ; 45.0 ; 8.0 ; -135.0
